

## TECHNICAL DATA SHEET

TH2.1696

ACRYLIC THINNER

Creation date 07/02/2020  
Rev. 0

GENERAL INFORMATIONS		
It is a product formulated with a mixture of selected raw materials to give a high solvent power and balanced evaporation. It allows a good spreading and atomisation of the coating products. ACRYLIC THINNER can be used as a washing thinner for equipment and substrates to be applied.		
CHARACTERISTICS OF THE SUPPLY PRODUCT		
		UNITY OF MEASURE
SPECIFIC WEIGHT	0.88 ± 0,1	Kg/L
COLOUR	Max. 30	Alpha
ASPECT	Transparent without suspension substance	Visual method
WATER	Max. 0.1	% of the weight
BOILING RANGE	/	°C

STORAGE
In a cool and dry place, and in a well sealed tin, the product is stable for at least 12 months.

The information given in this technical data sheet is indicative and based on our knowledge derived from experience and experimentation and can in no way constitute a guarantee. The purchaser/user decides independently on the suitability of the product for his own requirements in the context of the specific field of use. For safety information please refer to the relevant toxicological data sheet.
