

TECHNICAL DATA SHEET

PHOTOLUMINESCENT EFFECT ENAMELS

Creation date 13/09/21
Rev. 0

GENERAL CHARACTERISTICS	
A photoluminescent variant of all Vivcolor's converters are available for all the costumers.	
CHARACTERISTICS OF THE SUPPLYPRODUCT	
AVAILABLE COLOURS	Blue and Yellow.
CATALYSIS RATIO	Follow the catalysis ratio already present in the data sheets of the vehicle used.

APPLICATION MODE	
SPRAY	Follow the dilution methods already present in the technical data sheets of the vehicle used.
CAN	Only for one-component paint

RECOMMENDED LAYERS
Two/three layers crossed. To accentuate the intensity of tone, proceed with other coats of product respecting the waiting time between one hand and the next.

HARDENING TIMES
Hardening times may vary considerably depending on the thickness applied. A high thickness can compromise deep drying. Temperature can also have a significant influence on the temperature, especially on the evaporation of solvents. The temperature of the substrate must be at least 3 degrees above the dew point.

SURFACES PREPARATION
<p>The substrate must be treated with a special primer depending on the type to be applied and must be strictly white to enhance the tone of the finish.</p> <p>For applications on iron, galvanised iron and aluminium we recommend our epoxy primers 5BG4.B0001 and acrylic 2BG4.R9018.</p> <p>For plastic substrates, given the wide range available on the market, we always recommend a preventive adhesion test. The products we recommend are: Acriviv primer 2TG1.00ACP, Vivgrip 2TG1.2650 (particularly recommended for PP) and the same acrylic primer already mentioned.</p>

TOOLS CLEANINGS
The tools can be cleaned from the uncured product with DILUENTE NITRO ANTINEBBIA.

<p>The information given in this technical data sheet is indicative and based on our knowledge derived from experience and experimentation and can in no way constitute a guarantee. The purchaser/user decides independently on the suitability of the product for his own requirements in the context of the specific field of use. For safety information please refer to the relevant toxicological data sheet.</p>
