TECHNICAL DATA SHEET 2AG4I

ACRIVIV 70.100 MATT S.I. (SPECIAL INOX)

Creation date Latest update Rev. 19/02/21 26/05/25

### **GENERAL CHARACTERISTICS**

Single-coat matt two-component enamel with high weather resistance, good passivating power, maximum resistance to aggressive chemicals (detergents etc.), very low flammability, good elasticity, excellent gloss retention and high coverage. The enamel is particularly suitable for industrial use for the direct painting of metal substrates such as iron, light alloys, galvanised iron and stainless steel without the need for any primer or abrasive surface treatment. The applied film is matt with high surface hardness.

CHARACTERISTIC OF THE SUPPLY PRODUCT			
		NOTES	
SPECIFIC WEIGHT	1.2 ± 0,1 Kg/L 1.15 ± 0.1 Kg/L (A+B)		
VISCOSITY	R4 5000 cP 20°C		
SOLID CONTENT	70 ± 2% (weight) 55 ± 2% (volume)	Theoretical	
SPREAD RATIO (50 μm dry)	8,5 m <sup>2</sup> /Kg	Theoretical	
BRIGHTNESS	10-15 GLOSS	Glossmeter 60°	
CATALYSIS RATIO	WEIGHT: 100 (2AG2) + 10 VOLUME: 100 (2AG2) + 15	· ·	
PRODUCT NATURE	Hydroxylated acrylic res	sin.	

TECHNOLOGICAL CHARACTERISTICS AND RESISTANCE TESTS		
RESISTANCE		
ATMOSPHERIC AGENTS	Excellent	
NORMAL INDUSTRIAL ATMOSPHERE	Very good	
HEAVY INDUSTRIAL ATMOSPHERE	Very good	
MARINE ATMOSPHERE	Good	
HIGH HUMIDITY ENVIRONMENTS	Excellent	
ALCOHOLS	Good	
OILS AND FATS	Very good	
AROMATIC SOLVENTS	Good	
ALIPHATIC SOLVENTS	Very good	
TEMPERATURE	When this enamel is applied (completely dried and with a film free of imperfections), it has a continuous heat resistance of approx. 90-100°C. Above this temperature, the technical characteristics of the product are not guaranteed.

TECHNICAL DATA SHEET 2AG4I

ACRIVIV 70.100 MATT S.I. (SPECIAL INOX)

Creation date Latest update Rev. 19/02/21 26/05/25

APPLICATION MODE		
SPRAY	Dilution 10-20% TH2.1696 ACRYLIC THINNER	
	Nozzle pressure: 3-4 atm	
	Nozzle diameter: 1.8 mm	
POT LIFE	4 Hours (high temperatures can also	
	significantly reduce the operating time).	

HARDENING		
OUT DUST	40 min	
OUT OF TACT	2-4 hours	
IN-DEPTH	8-10 hours	
COMPLETE HARDENING	7-10 days	
Hardening can also be done in the oven at 80°C max (40'), after a flash		
off time of 20 minutes.		

### **OVERPAINTING**

The product is suitable for overpainting once applied. In the following 24 hours after application it is advisable to sand finely.

## **SURFACES PREPARATION**

Degrease thoroughly in accordance with norm. SSPC-SP1. Ferrous surfaces with calamine and/or rust must be treated by commercial sandblasting SIS Sa2. Fresh galvanised surfaces, before painting, must be treated by washing with degreasing agents or acids in order to achieve thorough cleaning of the substrate. For maximum adhesion, apply the paint in a very thin layer (40-60 microns or the amount needed to achieve coverage). For stainless steel (INOX) surfaces, traces of grease and any impurities on the surface must be removed, if present.

## **ENVIRONMENTAL CONDITIONS**

Particularly cold temperatures or environments with high relative humidity can slow down or change the characteristics of the system, which is affected during the painting phase by atmospheric conditions. It is therefore recommended to apply and initial drying in environments with a temperature above 10-15 °C and a maximum relative humidity of 75%. Light rain, high humidity or condensation during the 16 hours following application (20°C) can irreversibly corrupt the film formation. At temperatures above 25-30°C it is advisable to use a special retardant thinner or more of the thinner usually used, in order to avoid the formation of dots and bubbles (pin points) on the paint film.

#### **TOOLS CLEANING**

The tools can be cleaned from the uncured product with NITRO thinner.

#### **STORAGE**

In a cool and dry place, protected from direct sunlight and in a well sealed tin, ACRIVIV is stable for at least 12 months, the HARDENER at least 6 months. Particular attention must be paid to the storage of the HARDENER which, being susceptible to react with atmospheric humidity, once opened it must be consumed as soon as possible and at the same time stored in particularly dry environments.

The information given in this technical data sheet is indicative and based on our knowledge derived from experience and experimentation and can in no way constitute a guarantee. The purchaser/user decides independently on the suitability of the product for his own requirements in the context of the specific field of use. For safety information please refer to the relevant toxicological data sheet.
